CITY OF GLENDALE, CALIFORNIA

RED LIGHT PHOTO ENFORCEMENT PROGRAM

WARNING LETTER ONLY- RED MEANS STOP

The California Legislature has enacted legislation authorizing governmental agencies to use automated enforcement systems to issue citations for red light traffic violations. The City of Glendale has begun a red light photo enforcement program in a major effort to reduce the number of traffic collisions and associated injuries and deaths caused by red light violations.

The program uses automated camera systems and sensor devices to detect vehicles entering the intersection during the red light phase. The camera system is only active when the signal light is red. Vehicles crossing the limit line or entering the pedestrian crosswalk after the signal turns red are detected automatically and the camera system records images of the violator, vehicle and surroundings. The date, time, location, and the time the red signal has been red is recorded and appears on each image.

A vehicle registered in your name was detected by a red light camera system to be in violation of California Vehicle Code Section 21453(a) or (c). The information below describes the vehicle photographed violating the traffic signal:

Location of Violation: «Location of Violation»
Date of Violation: «Date of Violation»
Time of Violation: «Time of Violation»
License Plate #: «License Plate»

This letter is being sent to you **as a courtesy** during the first 30 days of the program, to remind you to drive defensively, and to adhere to all traffic laws.

This is a warning letter only. No enforcement action will be taken against you.

No response is necessary.

For more information you may contact the Glendale Red Light Photo Enforcement Program Call Center toll-free at 1-877-84SAFE-T (1-877-847-2338) from 9:00am to 4:00pm (MST)
